

# CurrentCare DataGuide

A guide to information available in CurrentCare

This DataGuide shows the status of DSP data in the NEW CurrentCare system as of April 23, 2025.

The Data Sharing Partner (DSP) migration timelines are provided to the best of our knowledge and are subject to change.

The OLD [DataGuide](#) applies to data in the legacy CurrentCare system, until it's decommissioned on April 30, 2025, after business hours.

# What is CurrentCare?

**CurrentCare** is Rhode Island's Health Information Exchange (HIE). It's a secure network that collects information from practices, hospitals, labs, imaging centers, and other data sources to share crucial patient information with authorized clinical staff.

Everyone benefits when providers access timely patient medical information:

- Improve care
- Save time
- Increase care coordination

**Consent Model is now  
Opt Out of data sharing.**

## Encounter Notifications

**Where are your patients?  
We tell you!**

- You provide a panel (list) of your patients or members.
- We tell you when they have encounters.
- Saves you time to focus on patient care, follow-up tasks, and care coordination.

Choose the tools that fit your workflow best: web-based tool (**Population Explorer**) or "push" options.
